- DMV last reported that 612,831 Californians currently have a suspended driver's license for failure to appear/failure to pay traffic tickets.⁵
- There are an estimated 6.0 million amnesty-eligible accounts (violations initially due prior to Jan. 1, 2013) in California worth an estimated \$5.0 billion. This calculation reflects data from only some of the trial courts; actual numbers may be higher and could be reflected in subsequent reports.
- Counties/Courts not reporting in this period: Mendocino, and San Bernardino.
- Compared to revenue projections through September 2015, several branch funds, including court construction and operations, are showing significant estimated revenue decreases since October 2015, which coincides with the launch of the amnesty program.

¹ Because the first reporting period contained three months and the second and third reporting periods contained four months, monthly averages were used to calculate percentage changes in outcomes.

² See above. Note, too, that the number of driver's licenses actually restored depends on further action by the participants directly with DMV; some individuals who have worked with courts to clear up specific violations may not be eligible to drive for other reasons, including outstanding violations in other counties.

³ Includes installment payments from amnesty-related payment plans established in the current reporting period and in the seven months of the previous reporting periods. After program operating costs of \$9,243,797, the amount available to distribute is \$18,633,276 to all sources.

⁴ See footnote 1; includes amounts from ongoing payments against installment plans.

⁵ Current as of December 2015.
