

## Quality Improvement Project Webinars

The purpose of the stakeholder webinars is to provide regular updates to stakeholders and organizations they represent. Updates include deliverables, timeline and work progress of the Clinical, Data and Technology, and Youth & Family Education workgroups, as well as actions and recommendations of the Expert Panel.

The webinars also provide a forum for CDSS and DHCS to seek input on ongoing efforts and to help CDSS and DHCS successfully complete the Quality Improvement Project (QIP).
